

Agents of Change

Creating National Quality Collaboratives
to improve dementia care

DO YOU WORK WITH PEOPLE WITH DEMENTIA? BECOME AN AGENT OF CHANGE!

Seeking health professionals from all backgrounds to participate in a national quality collaborative research study aiming to improve access to physical activity, occupational therapy, and respite and carer support for people with dementia and their carers living in the community.

You will:

- Complete an online training course (2 hours a week for 6 weeks) to develop skills in translating research evidence into your practice
- Develop your own implementation plan so that people with dementia and their informal carers are routinely provided with best practice care
- Gain consent from clients/patients to receive a phone call from the researchers
- Provide information about care provided

Benefits for you:

- Evidence-based training from leaders in the field
- Support to develop individualised and 'light touch' plans to improve your practice
- Ongoing access to clinical, consumer, and implementation experts
- Opportunities to network and collaborate with other clinicians
- A \$1000 stipend to support attendance at conferences or meetings present your work
- All continuing professional development requirements (for one year) for most allied health and medical professions*
- Opportunities to become a leader in dementia care
