Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description**Aim of Activity ***

The aim of this activity is to improve awareness of local palliative care options and to coordinate and facilitate access to palliative care services at home.

Description of Activity *

In 2021-22, Northern Sydney PHN will recruit 1.0FTE Palliative Care Lead to work with aged care service providers, primary health providers and community members to increase awareness and facilitate and coordinate access to safe, quality palliative and end-of-life care at home. Additional FTE will be recruited from 2022-23 financial year.

Activities will include:

- implementing learning needs analysis (mapping) to identify areas of strength and areas for development in end-of-life care and palliative care
- identifying existing local and national workforce education programs and initiatives that will support improved palliative care processes
- stakeholder engagement
- building community awareness about end-of-life and palliative care
- reviewing models of care coordination that will meet objectives
- delivering education and training to meet the needs of the palliative care workforce in the region, drawing on the available programs under the National Palliative Care Projects to avoid duplication and ensure a consistent and collaborative approach to building workforce capacity
- developing, in consultation with relevant stakeholders, communication processes across service providers, including how to access palliative care support and advice after-hours
- undertaking data collection
 - undertaking a Continuous Quality Improvement processes, to drive practice improvement, by embedding programs such as the Palliative Care Outcomes Collaboration (PCOC) program in everyday care practices to improve the quality of palliative care delivered to residents in the final stages of life and improve outcomes for residents, including managing and measuring pain and end of life symptoms
- participating and contributing to workshops to be held throughout the project period.

The objectives of this activity are to:

- improve awareness (workforce and community) and access to safe, quality palliative care at home and support end-of-life care systems and services in primary health care and community care
- enable the right care, at the right time and in the right place to reduce unnecessary hospitalisations
- generate and use data to support continuous improvement of services across sectors
- use available technologies to support flexible and responsive palliative care at home, including in the after-hours period.

The intended outcomes of the grant opportunity are to:

- improve the capacity and responsiveness of aged care and primary care services to meet local needs and priorities
- improve patient access to quality palliative care services available in the home
- improve coordination of care for patients, across health care providers and integration of palliative care services in the Northern Sydney region.

Activity Consultation and Collaboration

Consultation

NSPHN will continue to undertake extensive community and sector consultation in the design of the above activities. NSPHN will utilise the NSPHN Commissioning Evaluation Framework, based on the Quadruple Aim, to continually monitor and evaluate activity – including patient/consumer and provider experience measures, which will inform any future service redesign or areas for service improvement.

Collaboration

Northern Sydney PHN will work with stakeholders across the health and social care economy to set the strategic direction, to drive service improvements and achieve system change beyond their direct circle of control. NSPHN will work in partnership with the Northern Sydney Local Health District, General Practice, Pharmacy, Aged Care Facilities and consumers on joint activities to support quality end-of-life care and support co-design and co-delivery of initiatives.

Activity Priorities and Description

Program Key Priority Area *

Workforce

Other Program Key Priority Area Description**Aim of Activity ***

NSPHN will work with General Practitioners, Practice Nurses and other local primary care providers to:

- Provide an education package to support the importance of providing allied health services to residents in aged care facilities with complex medical needs.
- Provide guidance and education to General Practitioners, Practice nurses and other primary care providers on the criteria and use of the new temporary MBS Item numbers allied health and mental health item numbers for residents of aged care facilities.

Description of Activity *

During the COVID-19 lockdown, residents of aged care facilities were restricted with number of visitors (including from health professionals), which resulted in reduced services to patients. These services included programs and support to maintain and increase mobility. With the restrictions in place, residents were not provided these important services resulting in mobility decline and increased frailty.

NSPHN will work in collaboration with RACGP and local General Practitioners to promote access to and facilitate uptake of the Allied Health Aged Care COVID Response Education Package. GPs will be encouraged to undertake training that improves:

- Knowledge in the importance of improving and maintaining physical activities for older persons in aged care especially during times of COVID and other unforeseen disasters.

- Better understanding of the criteria and use of the new temporary item numbers
- Increased referrals for older patients to allied health professionals.

NSPHN will work with GPs and other health professionals to ensure that the workforce has access to ongoing professional development activities to build its capacity to provide high quality treatment and support to people residing in RACFs. NSPHN will continue to work with primary care providers, and other relevant stakeholders to review and strengthen local referral pathways so that clients are able to access the level and type of care that best meets their needs.

The expected outcomes of this activity are:

- Increased number of patients supported in Residential Aged Care settings
- Increased integration between primary health and allied health
- Improved patient outcomes and experience of service

Activity Consultation and Collaboration

Consultation

To support uptake of Allied Health Aged Care COVID Response Education Package training in the Northern Sydney region, NSPHN will work with its existing Education Advisory Committee to inform promotional strategies and assist with messaging and communication to local GPs. The Education Advisory Committee includes representation from:

- General Practitioners
- Allied Health Providers

- General Practice nurses
- Pharmacists

Consultation will also be undertaken with the NSPHN Clinical Council and other subject matter experts.

Collaboration

Promotion of education activities will be undertaken in collaboration with:

- Allied Health Providers
- General Practitioners
- Practice Nurses
- Other stakeholders

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

The activity is aimed at supporting physical health needs of people in residential aged care facilities affected by outbreaks of COVID-19 (two or more cases) through the provision of moderate intensity progressive resistance and high challenge balance training by physiotherapists, exercise physiologists and/or occupational therapists.

Description of Activity *

NSPHN will facilitate an open tender commissioning approach to procuring the service provider to deliver the package. The successful service provider will undertake the following:

- Group therapy to be led by a physiotherapist, occupational therapist or exercise physiologist. Allied health assistants and/or RACF staff may also assist with program delivery.
- Before commencing the program, professionals will be expected to visit each RACF they will .be working in to discuss logistics of the program with RACF management.
- Group therapy to be delivered twice a week, for 1 hour each session, on non--consecutive days. There needs to be at least one rest day between sessions.
- Group size is a maximum of 4 participants.
- An initial one-on-one consultation with each potential participant to determine baseline abilities. If participant is suitable for group therapy, the provider will construct an individualised therapy plan and take baseline measures.
- Therapy must include:

- o Resistance training: 2 to 3 sets of 10 to 15 repetitions that are moderately hard for the participant. Progressively increase repetitions and sets to 3 sets of 15 repetitions. Use weights when participants have progressed as outlined below.
- o Balance work: Standing balance exercises that progressively increase in difficulty. 2 to 3 sets of 10 to 15 repetitions that are moderately hard for the participant. Progressively increase repetitions and sets to 3 sets of 15 repetitions.
- o Weekly reviews of intensity and/or repetitions.

Activity Consultation and Collaboration

Consultation

NSPHN is undertaking consultation with the following allied health peak bodies to draw on their experience with the sector and inform engagement with allied health providers:

- Australian Physiotherapy Association (APA)
- Allied Health Professions Australia
- Exercise & Sports Science Australia and Occupational Therapy Australia.

NSPHN has also undertaken consultation with other eligible PHNs in NSW to consider the range of approaches utilised to commission the service.

Collaboration

NSPHN continues to work closely with staff from the identified RACF, Dorothy Henderson Lodge to develop a service specification for the package and determine the appropriate commissioning approach. NSPHN will work the nominated evaluation team from the Department of Health to support the evaluation of the service as it is rolled out.

Allied Health services to RACF residents will be delivered in collaboration with existing clinical supports including GPs, nursing staff and other care and support providers.
