Are you at risk of Type 2 diabetes?

Our practice is involved in a Quality Improvement Program to help identify patients who may be at risk of developing Type 2 Diabetes.

Why are we doing this?

- Type 2 Diabetes often develops silently.
- Early identification means better prevention and care.
- We are committed to improving long-term health outcomes for our community.

What does this mean for you?

- You may be invited to complete a short questionnaire.
- We will review factors like age, weight, family history, and lifestyle.
- If you're at risk, we will offer support, advice, and follow-up care.
